

P-value distributions under different research practices

Effect size: $d=1$ (moderate); Alpha=0.05 (red line)

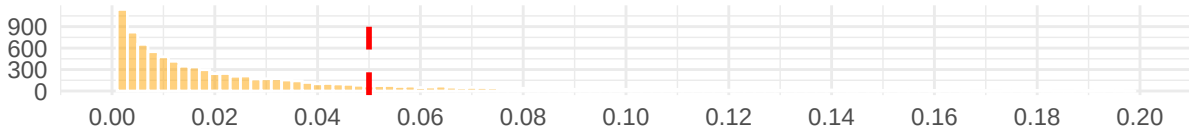

1. Original (no bias)

2. Publication bias (truncated at $p<0.05$)

3. P-hacking (min of 10)

p-value

Scenario

-  1. Original (no bias)
-  2. Publication bias (truncated at $p<0.05$)
-  3. P-hacking (min of 10)
